Tomorrow Airline

Set a Box

A dawn-at-dusk flier sees a lot of country, but he misses the knickerbocker.

Opportunity knocks but once. It would make a darned poor political speaker.

**THIRCE-WEDDED ALICE**

Alice Astor married Prince Glenisky lately and it took three separate and distinct ceremonies to tie the knot to her satisfaction.

First, she and her Russian Emigrant to a registry office, where the requirements of the civil law were met.

Next they attended an Anglican church, and were married again.

Finally, they joined hands before a Russian priest and were made one in the sight of the Greek Catholic church.

Alice probably figured that the set is which she holds requires a lot of marrying. And even at that an American divorce court could undo the whole day's work in ten minutes.

There are millions of simple marriages, solemnized with the usual words in a humble village church, that will "stay put" longer and more securely than these fancy society weddings that require three brothers, a ton of money, on the part of attendants—and an interpreter.

BY APPOINTMENT FURVYORS TO HIS MAJESTY KING GEORGE V.

**"CANADIAN CLUB" and Imperial WHISKY**

Are sold under a triple guarantee.

A pulp some general sweeps the political field after our war, but this time it is general apathy.

A democracy is land in which you get rich and then pretend you have ancestors to be proud of.

The country is getting so prosperous that little one-hour bank can interest a bandit.

After a day in the world's mart it is comforting to pray or go see Jackie Coogan.

It is estimated that 50 per cent. of the men who borrow books have children who enjoy throwing books at things.

"This plan should result in better housekeeping, improve financial organization, and certainly give more personal satisfaction in a co-operative business worthy of one's best thought and efforts."

"Children who perform useful service about the home add to the family's real income. If the child learns to dress himself, pick up his clothing and toys and put them in their place, he is releasing the mother's time and strength for other services, and thus contributes to the family income."

The family income is the sum total of money earned and service of the entire family combined. It is a co-operative affair, so plans for spending it must be co-operative. The whole problem of expenditure must be studied out by the wife and husband together, and a method decided on that will be agreeable to both.

The money value of the housewife's work and management in the home is often equal to the money received by the husband for his employment. She should feel herself equal to her husband in the support of the home. If women would estimate their worth in this way there would be fewer women

**HOMEMAKERS' CORNER**

(Conducted by Miss Alice L. Webb, State College of Washington.)

**THE HOUSEHOLD INCOME**

"The old way of doing out money to the housewife day by day with no definite plan for spending the year's income is not only unbusinesslike but, in a way, unsanitary and trouble producing. Much dissatisfaction can arise from this plan," said Dean Florence Herrierson of the Home Economics department at the State College of Washington in a recent radiocast from K.F.A.E. on "The Household Income."

"The question, 'What did you do with that twenty-five cents I gave you last week?' is supposed to be a joke, but it is not one for the woman who must ask for every cent she spends to buy food or the family clothing."

"Some women prefer to have an allowance, for then they can count a month ahead and plan accordingly. Even this method does not provide for the seasonal demands for clothing, fuel, and food supplies. If this allowance is given in actual money it necessitates close accounting from day to day, and time spent in the actual handling of the money."

"The charge system is another plan which does not allow for looking at the yearly expenditure in its proper relation. The only businesslike plan is for the husband and wife to have a joint bank account and a plan for their yearly expenditures made by both and carried out in absolute trust. In this partnership there should be no advantage taken on either side. The business of the family will be carried out by a definite plan for expenditures, accurate records of income and expenses as they occur and a checking up of expenses so that improvements may be made."

"This plan should result in better housekeeping, improve financial organization, and certainly give more personal satisfaction in a co-operative business worthy of one's best thought and efforts."

"Children who perform useful service about the home add to the family's real income. If the child learns to dress himself, pick up his clothing and toys and put them in their place, he is releasing the mother's time and strength for other services, and thus contributes to the family income."

Being that they must be wage earners to be economically independent and preserve their personal dignity. The farm woman certainly contributes as much to the family living by her unpaid household work as her husband receives in money representing the value of his labor on the farm.

"Dr. John B. Andrews, in his new book on 'Economics of the Household,' estimates the value of a housewife's labors as follows: If you hired a housekeeper she would receive \$30.00 a month, room, board and laundry. At this rate a housewife adds \$1200.00 a year by her service without taking into consideration her management difficult to measure in dollars and cents."

(Continued next week.)

**REMOVING GREASE SPOTS**

If you spill grease on something you cannot well wash, while it is still fresh lay on a folded cloth, cover with French chalk, magnesia or fuller's earth saturated in alcohol, then put a couple of thicknesses of white cloth over, next a newspaper, and finally a warm water. Leave it several hours, then brush or the chalk. If the spots have not disappeared repeat the operation.

"All work—play—noon get sick; Pack lunch—crank car—have picnic!"

S. D. S. Clark

**WOMEN'S FARM AND GARDEN ASSOCIATION**

Fourteen years ago there was organized the Women's National Farm and Garden Association, to prepare women for agricultural work, to stimulate farming and gardening activities, and to prepare positions for women in agricultural pursuits. There are now 3000 members, with local quarters at 1728 Stevens Bldg., Chicago. The annual meetings are held in New York, Boston or Chicago, because the majority of the members are in the east and middle-west. Mrs. Frances King of Alma, Mich., is the honorary president, with Mrs. Russell Tyson of Chicago as president, and Mrs. P. L. Richtmyer of the same place secretary.

**FANATIC'S GOD IS CHEATED**

Child Ready as Human Sacrifice by Fire Saved by Montreal Police

MONTREAL, July 23.—Thought to have been intended as a human sacrifice, an 11-month-old white baby was found by the police early this morning. The baby was resting in an ambulator surrounded with kindling wood. The wood, the child's mother, and the ambulator were all soaked with kerosene. A lighted railwayman's lantern was mounted the pile of wood. A Chinese who was pushing the ambulator and loudly singing what appeared to be an oriental chant of devotion was arrested.

The baby was identified as Jennie Cohen, who was kidnapped from in front of her parents' residence Thursday evening. When the choleraic laundryman appeared in early today he could offer no explanation and was released on \$1,000 bail to reappear on the charge later.

MACLEOD -- ALBERTA

public that is likely no more de-  
bated issue will be required the pre-  
sent year to finance the government's  
affairs. The small denominations of  
the certificate are popular and there  
are many purchasers of these. As an  
indication of improved financial con-  
ditions in the province also some of  
the larger purchasers include Alberta  
school districts and municipalities.

**Chief Justice Paves Away**

Chief Justice Scott of Alberta died  
at his summer home last week at the  
age of 78. He was one of the oldest  
residents of the North-West, having  
been on the bench for 30 years.

**Alberta Butter in Britain**

Shippers of Alberta creamery  
butter continue to be forwarded direct  
from Alberta producers to the British  
market. This movement assumed  
some proportions last year, and the  
marketing of the butter direct by the  
manufacturers proved very satisfac-  
tory. Recently three carloads left Ed-  
monton for the old country, and other  
shipments have been made from Cal-  
gary. The increasing popularity of  
the Alberta product on the British  
market was demonstrated by the fact  
that George Headley, who, on his return  
from Britain, brought back with him  
offers to handle continuous quantities  
of Alberta butter, provided the sup-  
ply could be made continuous through-  
out the year. This is a problem which  
is being taken under consideration.

**Live Poultry for United States  
Markets**

A carload of live poultry, the first  
to be shipped from Alberta to the  
United States market, left Viking last  
week for New York. The shipment,  
arranged for by a buyer from the  
United States, is the result of an  
experiment. It included 3450 birds  
being shipped from Camrose, New  
Norway, Ryley and Viking.

**Canadian Re-planting**

A total of 15,743 Canadians, most  
of them native born, have been re-  
patriated from United States during  
the months of April, May and June,  
according to figures announced by  
the department of immigration at Ot-  
tawa. Total immigration to Canada  
for the above three months was 53,  
245, an increase of 12,292 over the  
same period of last year.

**British Scientists Coming**

A party of five hundred distin-  
guished British scientists will visit the  
province August 25, following a gather-  
ing of scientists being held in To-  
ronto. A reception is being planned  
for the visitors.

**Harvest Help**

It is estimated by the Alberta la-  
bor bureau that the harvest help  
for Alberta this year will be  
10,000, of which 4,000 will be secured  
in Alberta. This figure may be re-  
vised at the crop season advance.

**New Hospital Districts**

New municipal hospital dis-  
tricts continue to be organized in  
the province. The latest is at West-  
lock, northeast of Edmonton, where a  
vote of the ratepayers will take place  
August 9th. There are 15 of these  
hospital districts operating in the  
province, and serving a total popu-  
lation of 155,000 or about one-third  
of the rural population of the prov-  
ince.

**PRIZE WINNING ESSAY.**

The prize winning essay in the es-  
say competition held by A. D. Per-  
son, for Alberta this year, was  
won by Mrs. Margaret Shields, who  
wrote "Progress of Macleod" was  
judged by the jury. The judges in  
the competition were Mayor Macleod,  
J. D. Macdonald and W. H.  
Shields, M.L.A.

If we are not to go astray on the  
future of Macleod and district, we  
must study its past and present, so  
that we may improve the future.  
The future of Macleod depends on  
the future of Macleod district. In  
Macleod and district today we get  
both town and district badly handi-  
capped by being short of finance.  
The rural part of Macleod district's  
finances are at present made by rais-  
ing wheat and other grains, beef type  
cattle, large numbers of light horses,  
a few sheep, a few pigs and a few  
grade dairy cattle and a few poultry.  
With the exception of the rail-  
road, the Macleod town derives its  
business chiefly from this source, and  
if the rural population can not make  
money the town cannot prosper. But  
there is hope that in is diversifying  
agriculture and business.

Diversifying farming means the  
growing less grain, as it has been  
proven that grain growing alone is  
not a sure investment and pays small  
dividends. It also raises the soil of  
the fibre necessary to prevent soil  
drifting. Selling less grass fed beef,  
beef, as grass fed beef shrinks heav-  
ily on long shipments, and when it  
does arrive at its destination it is  
only in a feeder condition, which  
brings only a low price and therefore,  
owing to the high cost of labor, land,  
taxes, no free range, fencing, in fact  
everything that has to be bought, is  
so much higher in proportion that  
there is no money in grass fed beef  
cattle.

States, we are forced to look for a  
market elsewhere. Great Britain is  
the market of the world. It is over  
6000 miles away. The freight rates  
are high. It costs money to transfer  
freight 6000 miles over land and sea,  
so the consequences are we must  
manufacture our own production into  
the finished product and do it here  
in our own district.

We ship our wheat to Winnipeg  
and Fort William and points east.  
They manufacture it into flour, cer-  
eals and other products, then ship it  
to the market. We are building  
up Winnipeg and points east and not  
Macleod and district.

We take our wheat to the elevator  
here. They dock us a bushel or more  
for every hundred they buy or handle  
for seed. Each bushel of seed  
seeds if ground up there would help  
fatten a pig or lamb. When we ship  
away again to Winnipeg we get an-  
other dockage for seed seeds and also  
have to pay eighteen cents a bushel  
freight on the dockage grain and we  
get no benefit from it whatever.  
The government should force the elevator  
companies to install cleaners and as  
the wheat is taken into the elevators  
it should be run through the cleaners  
and the screenings returned to the  
farmer at a nominal rate for clean-  
ing, otherwise he is docked for clean-  
ing and does not even get back what  
he has been docked for.

We ship our wheat and grain east  
and to the old country. We also ship  
our grass fed steers there for them  
to feed and put into condition for the  
market. We are paying freight on  
two articles, whereas one would do if  
we grain fed our own steers here and  
shipped the finished article. We  
have again on this as well as giving  
employment during the winter  
months and also giving steady em-  
ployment to the laborer the year  
round, instead of importing him  
for harvest and threshing at a high  
rate of wages and sending him away  
again when threshing is finished to  
spend his money in the east instead  
of building up the west and our district.

We ship our pork to Calgary and  
Chicago to be manufactured into  
bacon and hams, and they ship the  
finished product back to us again for  
both ways and build up Chicago and  
Calgary instead of Macleod. We  
ship our cream to Calgary, Ath-  
abasca and Fincher Creek cream-  
eries, and they ship the butter back  
to us at Macleod and we buy it at any  
of the stores. We pay the freight both  
ways and help build up Calgary, Fin-  
cher Creek and Lethbridge instead  
of Macleod. So you see, the main  
products of our district are shipped  
away and manufactured elsewhere,  
which results in a great loss to Mac-  
leod and district.

There must be a centre or gather-  
ing point or terminal to every dis-  
trict where the raw material is pro-  
duced together to be manufactured into  
the finished article. That centre in  
our district is Macleod. It should be  
called the Macleod Exchange, because  
the people derive their living by ex-  
change only. They do not put any-  
thing back into the producer's pocket;  
it just passes on. It is like a half  
way house on a long trip. It is a kind  
of convenience, but of no great im-  
portance. Macleod, you must change  
your ways if you or your district ever  
amount to anything. Get your flour  
mill working again; get creamery  
started; cold storage; and any other  
kind of industry that will benefit the  
district. Make Macleod a place to  
manufacture the district's raw material.  
If necessary give the manufac-  
turers a bonus to get them started.  
Towns and cities have been giving  
protection and bonuses to manufac-  
turers for years; it is nothing new.  
The money this district spends annu-  
ally in express rates on cream alone  
would build a creamery and equip it,  
and that is only one of our district's  
products that has been passing on.  
Figure them all up and see for your-  
self what Macleod and district are  
losing each year.

The finished articles are the re-  
sult of diversified farming, in co-  
operation with diversified business.  
I will now join these two together  
and call it diversified business.

Every effort should be put forth to  
encourage the government or munici-  
palities to give a bonus to each farm-  
er who successfully planted and cul-  
tivated a certain amount of trees and  
shrubs, each year, for decorative as  
well as shelter belts. This would in  
a few years change our district from  
open plains to beautiful homes and  
farms; would stop drifting of soils;  
would store up moisture by holding  
the snow, and would make it pos-  
sible to raise small fruits and a few  
colonies of bees which would be of  
great benefit to rural life.

Macleod requires a nice crop rest  
room for the visiting ladies; a safe  
play ground for the children to play  
and amuse themselves in, with plenty  
of shade trees and some swings, etc.,  
and a place for the men to meet, rest  
and smoke and talk over business or  
spend a pleasant hour.

## AUTO CRASHES

### INTO DEMOCRAT

While driving up 2nd avenue on Saturday evening last in his auto about 11 o'clock, T. May, of Macleod, smashed into a democrat and team driven by R. Carroll, who was proceeding to his farm with a full complement of provisions. The democrat turned turtle, the driver being thrown violently on the sidewalk, while the contents of the vehicle were scattered far and wide over the avenue, and the frightened team careered wildly on into the night. Fortunately for Carroll, he suffered nothing worse than a severe bruising and shock. The driver of the car was at once taken into custody by Chief of Police Ribley. The auto was damaged, the midguard and forward badly broken and buckled. The damage to the backboard and stock of the democrat was considerable. As if adding insult to injury a daring "lizard" proceeding up the avenue soon after drove through the traces of broken democrat and general groceries, and was promptly nabbed by the police for driving without lights.

Two out of every three persons in the world are unable to read and write, and one billion of the 1,750,000,000 persons in the world are non-Christian.

The regular meeting of the town council was held on Monday evening last. A full attendance was recorded and the usual routine business transacted. Nothing of an important nature was discussed.

S. Gillespie, of Macleod, has purchased the home and furniture of R. W. Stewart, on 22nd street. Mr. Stewart, who has accepted a position with the Miller, Moore Hardware Co., has moved with his family in Calgary.

A 100 pound cake of ice found a resting place on the fourth floor of Tommy Dixon's right foot, which necessitated the removal of the toe from the motor transfer man. Tommy said it was a slippery deed the ice slipper.

Suffering from a bad fracture, as the result of a kick from a horse, the 10 year old son of Mr. and Mrs. Elgie, of Olsen Creek, was brought into the Macleod hospital by Dr. Allan Kenney for medical treatment. The injured boy is progressing favorably.

"Freddy" Perkins, noted angler of Macleod, made a record catch while

Macleod District

WEEKLY CROP REPORT

Harvesting has started in Southern Alberta. Cutting started on the lead in this district and this week will see fields in several districts full before the binder.

Several rains over the weekend starting Saturday night at 10:30 and continuing practically all of Sunday, Sunday night and Monday morning, has definitely broken the dry spell with the best general rain since June 26th. Following the driest month of July in years, the rain is welcome because it cannot be said to be oppressive. It will bring the effect of preventing further loss of the crop through drought. It will bring on a lot of late grain that will make feed, it will relieve the feed situation, both as to winter feed and fall pasture, and it will fill up the summer-fallow, providing some surplus moisture for next year's crop.

The rain, too, will help in filling grain so that shrivelled kernels which some correspondents complain of, will not be at all general. The wheat should be plump and of good grade this year.

Crops Hard to Estimate

It is pretty hard to estimate even yet just how the crop may turn out. Short straw is carrying good heads on summer-fallow all through the southwestern crop district. Fields which look like five bushels will

thrust out closer to fifteen. There will be many 25 and 30 bushel crops all through Cardston, Macleod and west districts, while the irrigated sections will furnish many surprisingly good yields. In the southwestern crop district, however, there will not, on the whole, be much better than one-quarter of an average crop.

The rain will give irrigators, who have been sowing water to the utmost capacity of the ditch, a let-up, and will also be helping on the second alfalfa crop which is now about ready for cutting.

Following the rain, cutting will start in many of the dry districts, but in the better sections of the south harvesting will not be general till about August 15th, and where the grain is very heavy, not until the last week of the month.

## MACLEOD METHODIST CHURCH

### Sunday Services

At the morning service, Mr. Armstrong will discuss "The First Miracle of Jesus." In the evening, he will give the subject of his address dealing with the fundamental nature of Religion. The subject for next Sunday will be "What does it mean to be a Christian?" On Sunday, August 17th, he will discuss the question: "Is the Christian way of life practicable?"

ST. ANDREW'S PRESBYTERIAN CHURCH SERVICES

11 a.m.—Subject, "Lessons From the Life of St. Andrew."

7:30 p.m.—"Lost Opportunities." Rev. D. Donahue (Cowley), will preach at both services.

## NEW CAFE IN MACLEOD.

A new cafe has been opened in Macleod, which will be known as "Charlie's" cafe. The new restaurant is situated on 2nd avenue between 15th and 16th streets, and is owned and operated by an old friend of C. P. E. R. player, who has resided in Macleod for many years, namely Charlie Penland. Only white help will be employed which only naturally calls for real white service.

The Jewish World tells us that there are thirteen Jewish members in the present British House of Commons. However, we are not to think that of necessity the number is an unlucky one. The present House is Circus. Run like everything, cause it's going to be some show.

C'mon over to Jackie Macleod's house, Monday, August 11th, you know, the corner of 3rd avenue and 15th street. Young Chris, Cooney and him are having a real fair and circus. Run like everything, cause it's going to be some show.

CONFECTIONERY

FRESH FRUITS AND VEGETABLES ARRIVING EVERY DAY

HOME GROWN AND IMPORTED.

The scarcity of rain has a depressing effect on buying. People are saving money instead of spending it, only necessary articles are asked for. No matter how tempting the prices it is useless to advertise what you are trying to do without—our policy is to lighten our stock till things look brighter.

We dress the window and show cases with prices at ruinous figures. As Leather Goods are high it is necessary to give you White Canvas Wear at Cost, and less than manufacturer's cost. This hot weather White Wear should be very popular. On regular purchases you get 10 per cent. extra little money is circulating we want to get a share of it, and the only way is to make the cost appealing to you. Boys' and Men's Suits we can save you money on.

Ladies' Oxford's in Kid and Patent Leather. A large stock must be cleared out regardless of cost.

Gingham and Prints from 25c. per yard up. Give us a trial and we will endeavor to please you.

Hosiery for Men, Women and Children at Cut Prices.
